
MIS332

Class Project

Class Project Delivery

- **Option 1:** Design a blockchain-based product and prepare a business proposal.
- **Option 2:** Conduct research on an existing blockchain project in the market and prepare a business case study.
- **Final submission:** A business proposal or case study plus presentation slides (either Chinese or English is acceptable).
- **Team size:** Up to 4 members per team.

Business Case

- Company background
- Industry background
- Blockchain solution (including technical design)
- Challenges faced by the company
- Proposed solutions
- Impact on the industry and the market

Business Proposal

- Project background
- Business objectives
- Proposed solution
- Implementation plan
- Cost budget
- Revenue projections
- Legal and regulatory compliance

Proposed solution (technical design)

- Blockchain architecture (public blockchain / private blockchain / consortium blockchain)
- Consensus mechanism design
- Security mechanism design
- Data privacy protection
- Smart contract design
- Scalability considerations
- Node infrastructure design (node roles and responsibilities)
- ...

Key Milestones

- **Weeks 9–10:** Form teams and finalize the project topic
- **Week 15:** In-class project presentation
- **Before June 5:** Submit the project report
